

Job Opportunity

Senior Test and Support Engineer (TSE)

Purpose of job

ATLAS ELEKTRONIK UK are looking to employ a flexible and proactive mechanical and electrical test and support engineer to support AEUK products. The role will include:

- Support to all aspects of testing and acceptance for given projects under the supervision of the Through Life Support Manager or the T&A Manager.
- Maintain in service equipment through telephone support, testing, fault finding and repairs under the supervision of the Through Life Support Manager.
- Management of a number of Labs to ensure 5S and engineering standards are maintained.
- Provide Apprentice training on electronics and engineering principles as required.

This is an excellent opportunity to become involved in a rapidly growing organisation on both a national and international scale.

Reporting relationships

Head of Services and Support Department
Test and Acceptance Manager
Through Life Support Manager

Location

Dorset Innovation Park, Winfrith

Employment status

Permanent

At Atlas Elektronik UK, we support our staff to create work-life balance and encourage applications from individuals who are looking for part time or condensed hours as well as full time opportunities.

Responsibilities vary greatly according to the size and type of project, but typically they will include:

- Field Service Support of In-Service equipment in the United Kingdom (UK) and worldwide.
- Survey and repair of AEUK products / equipment at AEUK premises.
- Deployable to conduct system grooms, equipment integration, surveys and repairs on AEUK products installed and in operation. Located in UK and worldwide.
- Create and develop test plans, procedures and schedules for verification of design testing.
- Develop, manage and perform testing of product, unit and integration whilst working with project teams.
- Support all test activities and implement test solutions both at AEUK and off site at test houses and customer sites.
- Writing technical reports and test documentation and conducting evaluation of test evidence and survey and repair information.
- Secondment into other departments in order to develop product knowledge and integration for predefined periods.
- Support dedicated equipment trials both onsite, UK and worldwide.
- Conduct regular Apprentice training on engineering principles.

The successful candidate will have a strong engineering background with the capability to be able to work alone on electro mechanical systems, identifying and where feasible resolving or recommending remedial courses of action.

Knowledge, skills and personal qualities required

- Degree, HND/HNC or equivalent experience in mechanical and or electrical Engineering or marine engineering.
- Experience working on / installing equipment / integrating systems on various platform types.
- Experience of working with Mechanical/Electrical Diagrams and Control Systems.
- Be able to deploy to customer locations with minimal notice.
- Previous MoD experience would be beneficial (optional).
- An understanding of defence systems in particular in the maritime environment would be an advantage.
- Must be capable of writing technical reports and extracting information from technical volumes or from experts.
- •

... a sound decision

- Knowledge of Standards ie Electrical, Def. Stan's, Mil Specs, CE Marking etc.(optional)
- Previous knowledge of Submarines and or Ships would be an advantage (optional)
- Ideally previous test and acceptance and or field service experience conducting fault finding on mechanical and electronic equipment.
- Strong IT, Microsoft Office skills.
- Strong interpersonal and verbal communication skills required to interface with customers and staff at all levels within AEUK, third parties including contractors, sub-contractors and suppliers.
- Have excellent engineering skills and problem solving abilities.

Challenges

- Working as a part of a team in a rapidly changing environment, meeting challenging timescales, reliably delivering a range of services, on time and to budget.
- Working under other departments in order to support production and increase product knowledge.

Key accountabilities

- Through Life Support Manager
- In-Service Support Managers
- To the T&A Managers allocated to projects within Submarines, Ships and MoD Divisions

Behavioural requirements

- The successful candidate must have excellent customer service skills and must be able to promote the company to all existing and potential customers.
- Must be a positive and strong-minded self-starter with motivational drive to overcome problems quickly and effectively.
- Strong interpersonal and well-developed communication skills (written & verbal).
- Being able to work alone or within a team with minimal supervision.
- Comfortable working offsite, in workshops or within offices.
- Be prepared to conduct tests and witnessing testing both onsite and away from base at test facilities.
- Flexible and adaptive.
- Confident, articulate and robust.
- Effective time management within a multi-tasking environment.
- The ability to work effectively within a growing, changing workplace.
- Promote a "can do" attitude.

More information

The successful candidate must be able to achieve full SC (Security Clearance).

Prepared to travel to other sites at various locations within the UK and out of UK at short notice.

UK Full Driving Licence.

How to apply

Please forward your CV and a covering letter explaining why you are suitable for the post to Recruitment@uk.atlas-elektronik.com by the closing date and state the job title in the subject line.

Due to the nature of our work and the projects you will be working on, all candidates must be eligible to gain security clearance. ATLAS ELEKTRONIK UK Ltd is an Equal Opportunities employer and welcomes applications for all posts from suitably qualified people regardless of age, disability, ethnicity, gender, marital status, sexual orientation, religion or belief.

Only successful applicants will be contacted.
